PROFESSIONAL SUMMARY

Former Executive Chef with 10 years experience. Before switching careers I developed skills such as working well in extremely stressful environments, multitasking, effectively leading a team to specific goals.

I love problem solving and am enjoying the challenges and fast paced nature of the coding bootcamp I'm attending. I really like working with Javascript and jQuery and am looking forward to using them more in real world applications.I have a passion for creating and an unparalleled work ethic.

I'm hoping to bring these qualities into my new career, starting in an entry level developer position, and to advance rapidly. I'm looking forward to being part of a team where I can learn from my peers and increase my skills in this field.
